

WHEELS AND CASTORS FOR THE BUILDING MATERIALS INDUSTRY

Highest reliability under harsh operating conditions such as dust, humidity, or high temperatures: load and drive wheels as well as guiding and load rollers for conveyors, hoists, manipulators, bucket conveyors, or transport equipment.

We supply manufacturers of equipment and production technology in the building materials industry, such as gravel and sand pits, stone and brick producers, concrete and precast concrete plants, chipboard manufacturers, and sawmills worldwide with quality wheels and rollers for trouble-free and energy-efficient operation of equipment.

- Innovative wheel-tread materials
- Extensive standard range of products available from stock
- Customized solutions
- "Made in Germany"
