WHEELS AND CASTORS FOR MAINTENANCE

Whether predictive maintenance or breakdown – only qualified servicing guarantees long service lives and reduces cost-intensive disruptions in the production process.

Professional industrial maintenance requires the use of precisely fitting, high-quality, and cost-effective spare parts. Our philosophy is therefore to supply wheels and castors that offer our customers safety and reliability. Always with the claim of highest quality and perfection down to the smallest detail. Whether series or custom-made production, we have been your competent partner for over 75 years.

- Innovative wheel-tread materials
- 30,000 different items
- Wheel diameters from 30 mm to 1,800 mm
- Extensive standard range of products available from stock
- Customized solutions
